(a) resonant tail, $\ell' = -2$
$P(\sigma^2 > K)$
first-order dressing cost $K = \sigma^2$
N'=12
N'=14
exact (η ensemble)
exact S, planar
chord
(b) first-order decoder
density
decoder eigenvalue λ
N'=14 first order
chord (first order)
exact uplift
(c) decoder statistics
chord / exact first order − 1 (%)
N'
