decoder angles, $N' = 14$ (2 realizations)
first order: T_2=0.573, H=0.1042
self-dressed (blocks): T_2=0.624, H=0.1033
exact: T_2=0.640, H=0.1071
density
$y = \mu^2 = \cos^2 2\theta$
first order → exact: shift, not reflection
per-state change (exact − first order)
$E[y\,|j] - y_1$
$E[y(1-y)\,|j] - y_1(1-y_1)$
first-order y_1 of state j
