
$N' = 6$
$N' = 7$
$N' = 8$
mean
median (bar: to 90%)
tower: $\kappa = 0$
symmetrized
generic
dressing $\kappa = 1/\mu - 1$
chord charge s' of the new sector
sectors with dim $B \geq 30$, $N' = 5$-8
resonant, small boundary target
max over sector (symmetrized)
mean over sector (symmetrized)
max over sector (generic)
mean over sector (generic)
κ
edge distance of the currents, $\min|s' \pm \frac{1}{5}|$
