U_T of the fortuitous subspace (CV eq. 89, min over seeds)
prediction from the room count: ■ $U=1$ (rk $D_T = R_T$), ◩ $0<U<1$, □ $U=0$; ✗ disagreement
00 (charge-preserving)
10 (+ψ)
01 (+χ)
11 (+ψ+χ)
old sector (N_ψ, N_χ): diagonal | χ-heavy | ψ-heavy
